THE CREMATION FURNACES OF AUSCHWITZ, PART 2: DOCUMENTS

Castle Hill Services, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Few objects of utter evil have inspired human imagination more than the ominous gas ovens of Auschwitz. Auschwitz is the epicenter of the Holocaust, the baseline of absolute evil. Here is where millions are said to have been murdered and obliterated in the gas ovens by the Nazis. But that s where the problem begins, because there was no such things as a gas oven. What did exist, though, were cremation furnaces used to turn into ashes the remains of deceased inmates. Survivors claim that thousands of corpses were burned in them every day, and that smoke and flames shot out of the crematory chimneys.The present study investigates the Auschwitz cremation furnaces from the bottom up. In the first section, the authors summarize the principles of combustion technology and briefly explain the chemical and physical processes of corpse cremations. Next they sketch out the development of modern cremation techniques with emphasis on Germany, and they investigate the results of several scientific cremation experiments conducted over the past 100+ years. Based on this data and on numerous scientific publications on cremations, they establish important benchmark figures, such as how long it takes to cremate a corpse, and how much fuel is needed.The second section analyzes in depth the activities of the German company Topf Sons, who manufactured the cremation furnaces at Auschwitz and other Nazi camps. Authors Mattogno and Deana next describe in detail the history and properties of the different types of furnaces installed. They then calculate cremation durations and fuel consumptions for each of the furnaces based on scientific experiments, documented data from actual cremations in similar furnaces, and mathematical calculations. They show that witness...
