

The Latino Psychiatric Patient: Assessment and Treatment

Filesize: 8.29 MB

Reviews

Completely essential read through ebook. This can be for all who statte there was not a well worth reading. You wont really feel monotony at at any time of your own time (that's what catalogs are for relating to if you request me).

(Maud Mitchell)

THE LATINO PSYCHIATRIC PATIENT: ASSESSMENT AND TREATMENT

American Psychiatric Publishing. Paperback. Book Condition: new. BRAND NEW, The Latino Psychiatric Patient: Assessment and Treatment, Alberto G. Lopez, Ernestina Carrillo, Constituting nearly 12 percent of the US population, Latinos (a term used interchangeably with the term Hispanic throughout the text) are expected to become the second-largest race ethnic group (after non-Hispanic whites) by 2010. This growth emphasizes the increasing importance of understanding the cultural factors affecting the psychiatric treatment of Latino patients. Integrating culture-specific treatments, such as the services of a folk healer (called a santero in Cuba and a curandero in Mexico), with more traditional interventions, such as medication and case management services, is crucial to achieving successful outcomes for Latino patients. This unique book helps mental health professionals acquire the knowledge, skills, and -- most important -- the cultural sensitivity necessary for treating Latino patients in the United States. The book can aid clinicians in learning to appreciate the importance of language, culture, religion, gender, sexual orientation, race, and ethnicity in psychiatric evaluation and care. The editors of this insightful, wide-ranging text have structured the work of 20 distinguished contributors into three major sections: * Section I, Overview, presents an overview and brief history of Latinos in the United States, including demographic data and statistics on their physical and mental health. Variables include language, religion, geographical origin, class, race, degree of acculturation, gender, education, and sexual orientation. Of particular interest here is practical guidance on conducting culturally sensitive psychiatric evaluations of Latino patients.* Section II, Individual Countries, highlights the fascinating differences among the major Latino subgroups in the US, including Colombia, Cuba, the Dominican Republic, El Salvador, Mexico, Nicaragua, Peru, and Puerto Rico, and details their distinct characteristics (from cuisine, music, and literature to dialects and traditions) so that clinicians may better understand these patients and incorporate...
