Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: .that is for each column, are given in the bottom row of the table--1, 0, 14, 6, etc., making in all a total of 126. Similarly, the regression of x on y is Table (32). Correlation Between Increment Of Unskilled Wages And Increment Of Rents In Certain Industrial Towns Of The United Kingdom. $x=0.$ (+2.2. To draw the first line we note that it passes through the points (0, 1.25) and (5, 1.8); also the second line goes through the points (2.2, 0) and (2.5, 5). The two lines intersect at M (2.28, 1.5), the mean of the distribution. They are drawn together in fig. (26). Table (33). Correlation Between Unskilled Wages And Rents In Certain Industrial Towns Of The United Kingdom. Example (6).--Instead of discussing the Changes in Wages and Rents between 1905 and 1912, it might be of interest to find the correlation between index numbers representing Actual Wages and Rents in October 1912, taken from the same Report. The necessary data for this purpose appear in Table (33) showing the distribution of frequency between the different classes: e.g. seven towns were observed in which the index number for wages was between the limits (79.84) and the index number for rents was between the limits (53.60). The wages figures quoted in Table (33) refer only to unskilled labour in the building trade; the inquiry actually embraced certain occupations in the building, engineering, and printing trades, these having been selected as industries which are found...
